

UniGroup Worldwide and its insurance partners offer a package of international insurance products specifically designed for the exposure to loss faced by employees on overseas assignment — the ExtraPro™ Expatriate Protection Plan. This plan is the first international insurance product available that offers needed coverage in one package from one source.

The ExtraPro Plan includes coverages, similar to personal insurance policies purchased by your employees in their home country, that are designed to protect them from loss or damage to their personal property or automobiles overseas. The package of coverages includes an Ocean Marine core coverage component that insures your employees' household goods in transit to the overseas destination. Available supplemental coverages include Personal Property insurance to protect property at the overseas residence; International Personal Residence coverage for valuable articles, personal liability, political risk and international automobile insurance; and Medical Assistance coverage.

Pro™

Your employees on international assignment deserve security and peace of mind — they deserve the superior protection of the ExtraPro™ Expatriate Protection Plan backed by the world's most highly regarded insurance carriers.

Contact your UniGroup Worldwide moving representative for information on implementing this vital program within your organization.
