

McCollister's Auto Transport

McCollister's launched our Enclosed Carrier Auto Transport division (MCAT) in the spring of 2015. We started this division with a few units and have experienced explosive growth over the past 12 months. We are very excited about this new division and the future potential this brings to McCollister's Transportation Group.

McCollister's Auto Transport Division uses highly specialized auto transport drivers and equipment for niche shipments requiring lift-gate loading service, air tight trailers, car and seat covers, soft strap tie down and complete protection from inclement weather and debris. We are currently servicing and building partnerships with several OEM's (Original Equipment Manufacturer's) to timely and safely transport marketing vehicles for events such as Auto Shows, Proving Grounds, Photo Shoots and Ride and Drives. Our equipment allows these vehicles to arrive in the exact same condition they were shipped. We are also experiencing tremendous growth with high end auto auctions such as Barrett-Jackson, Mecum Auctions, Gooding and Company, and Bonhams. At these auctions we are focused on the transport of classic, antique, muscle cars and exotic vehicles to individual buyers, dealers and restoration shops.

At McCollister's Auto Transport we are flexible and offer a variety of services depending on our client needs. We can offer residential pickup and delivery for our customers buying or selling one or more cars to or from an auction. We offer truckload capacity for a dealership or restoration shop with the need to transport multiple vehicles to or from anywhere in the United States. And we offer our OEM's the flexibility of shipping direct from ports to dealerships or marketing events while also offering exclusive use for prototype or concept vehicles requiring complete security.

Whatever your vehicle transportation needs are McCollister's is flexible to provide a solution. We take pride in our experienced drivers and our equipment to ensure a consistent and overall positive experience for our customers. This separates us from our competition and allows us to continue our growth within the specialized vehicle market.
