McCollister's Logistically Supports the Sunshine ☀️

McCollister's has been a **Logistics Specialist** for the Solar Industry supply chain process since 2002.

Our client list includes industry energy leaders. The McCollister's facilities, fleet resources, and technology systems provide full supply chain visibility to the solar industry. Speed to the market is the key factor for these customers and McCollister's has the resources that compliment this need.

Our network of distribution facilities are linked through NetView warehouse management system. This EDI capable system allows our customers a 24/7 Web View and access to inventory.

When you couple these inventory tools with our transportation system you create a customer solution that cannot be beat.

McCollister's is proud to service the Solar Industry and we believe that we will continue to grow this account base.
